SUPERVISORY PATENT EXAMINER**

DETAILED ACTION

- This action is responsive to the following communication: an Amendment filed on 07/18/06.
- Claims 1-16 are pending in the present application.

Response to Arguments

Applicant's arguments, see pages 11-18, filed on 07/18/06, with respect to claims 1-16 have been fully considered and are persuasive.

Allowable Subject Matter

Claims 1-16 are allowable over prior art of record. The following is an examiner's statement of reasons for allowance: Claims 1-16 of the current application are allowed for the reasons pointed out by the Applicant's remark (pages 11-18) whereby monitoring with at least one component of said plurality of print system components said network for a successful print task, wherein said successful print task is subsequent to said first print task failure.

The closest prior art Luman et al., US Patent No. 6,452,692, discloses that the print job is monitored at the printing device for a successful completion (col. 4, lines 17-18) and if the print job fails then it attempts to reroute the print job to an alternate printing device on a network (col. 4, lines 33-56).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
